

SUBJECT: Revision of NIS 22, Section 62

ATTACHMENT A

Suggested Revision for Page 6, Para. 1

Rumania may be divided into two major landform regions:

1. Mountains.
2. Plateaus and lowlands.

The mountains consist of:

- a. The Transylvanian Alps.
- b. The Moldavian Carpathians.
- c. Apuseni Massif.

The plateaus and lowlands consist of:

- a. The Western Lowlands.
- b. The Transylvanian Basin
- c. The Moldavian Plateau
- d. The Dobrudje Platform.
- e. The Wallachian Plains
- f. The Danube flood plain and Delta.

[NOTE: If these terms are adopted make sure they are used throughout the text].
